S.No: 16	Exp. Name: ***Write a C program to implement different Operations on Queue using Array representation***	Date:2023-06-15

Aim:

Write a program to implement queue using **arrays**.

Source Code:

QueueUsingArray.c

```
#include <conio.h>
#include <stdio.h>
#include "QueueOperations.c"
int main() {
   int op, x;
   while(1) {
      printf("1.Enqueue 2.Dequeue 3.Display 4.Is Empty 5.Size 6.Exit\n");
      printf("Enter your option : ");
      scanf("%d",&op);
      switch(op) {
         case 1:
            printf("Enter element : ");
            scanf("%d",&x);
            enqueue(x);
            break;
         case 2:
            dequeue();
            break;
         case 3:
            display();
            break;
         case 4:
            isEmpty();
            break;
         case 5:
            size();
            break;
         case 6: exit(0);
  }
 }
}
```

QueueOperations.c

```
#include<stdio.h>
#define MAX 100
int queue[MAX];
int rear=-1,front=-1;
int count=0;
int enqueue(int x)
{
   if(front==-1 && rear==-1)
   {

   else
   {
      printf("Deleted element = %d\n",queue[front]);
      front++;
      count--;
 }
   return x;
}
int display()
{
   if(front==-1 && rear==-1)
   {
      printf("Queue is empty.\n");
 }
   else
   {
      printf("Elements in the queue : ");
      for(int i=front;i<=rear;i++)
      {
         printf("%d ",queue[i]);
  }
      printf("\n");
 }
}
int isEmpty()
{
   if(front==-1 && rear==-1)
```

```
   {
      printf("Queue is empty.\n");
 }
   else
   {
      printf("Queue is not empty.\n");
 }
}
int size()
{
   printf("Queue size : %d\n",count);
}
```
